5. HTML 5

5.6. Article

El elemento <article> especifica contenido autónomo e independiente.

Un artículo debe tener sentido por sí solo y debe ser posible distribuirlo independientemente del resto del sitio web.

Ejemplos de dónde se puede utilizar un elemento <article>:

- Publicación en el foro
- Entrada en el blog
- Artículo de periódico

```
1 <article>
2   <h1>Mi artículo</h1>
3   Bla bla bla
4 </article>
```

scientists were concerned that the bright material might be debris from the rover itself, so they ordered Curiosity to toss the Mars sample as a safety precaution, mission managers said in a statement.

As it turns out, the bright particles are actual Martian in origin, they added.

Curiosity is scooping up Mars dirt in a spot called "Rocknest" in preparation to deliver the first samples to a pair of instruments on its car-size body. The rover scooped its first Mars sample on Oct. 7, but further work was delayed when the rover's cameras spotted a bright object—likely a piece of plastic—on the ground in the area.

Scientists had cleared Curiosity to start scooping Mars dirt again ahead of the first sample study when they spotted the new bright material. Curiosity's initial Mars dirt scoops are designed to clean the rover's sampling system. [Mars Rover Curiosity's
